Download MPlayer plugin for Firefox Download Zim Desktop Wiki Zim Desktop Wiki is an OpenSource project that makes it easy to build Zim Desktop wikis. The desktop wiki application is based on Zim (an enhanced wiki-writer/editor that integrates well with KDE). You can think of Zim Desktop Wiki as a WYSIWYG (what you see is what you get) application, that you can use to create, modify and edit Zim wikis. The next time you try to install Zim Desktop Wiki, you will be asked if you want to install this software in the wiki section. Zim Desktop Wiki How To Install This wiki might contain packages that are not safe for daily use. If you would like to get a safe version, you can do it in the following way. Create a folder in the /tmp directory. Download a zip file that you can find in the /tmp directory. Extract the zip file. Double click on the file that has been extracted. A new folder is created in your home folder. Open the file with a text editor, and copy the file with the folder name and save it. Remove the original file from /tmp. Zip the folders that you have created in the /tmp folder. Move the zip file to the /tmp folder.
