Nov 21, 2016 We bought a brand new car from BGFG (I cant remember the Dealer name) and they had NO DVD IN THE NAV. We wanted to buy a DVD like in our current car but they went overboard and bought the CD ONLY Navigation System with this 2004 gmbh (German Edition) vehicle. The only option is 2000 and we dont want to spend that much money on a dvd that we can replace years later. So we finally just bought a Navigation System with CD that is in stock here at their local dealership but had to wait 8 weeks. When we finally got the paperwork and went to install it, they said that our car is an older model and it doesnt come with DVD as a package or CD as a package and that they can only put the DVD

I have no problem applying a variety of different colors to an image I'm rendering. The problem occurs when I try to blend more than 8 colors in the same frame. I try to blend many colors from my colormap one by one to control how the colors blend. I start with red, then green, then yellow, then purple, etc. Then I try to blend the colors from red to pink and the red image doesn't change at all. Here's the code I'm using to blend the colors.
